AGAINST HIGH SPEED  
DRILLS AND FORCE

## 2" LITE STRONGROOM DOOR

### BURGLARY RESISTANT PROTECTION

#### KEY FEATURES

- Door - Solid door slab with a protective thickness of 50mm (2") forms the basis of the door, which has an overall thickness of 147mm. Filled with a specially formulated ChubbSafes F60 barrier material reinforced with steel fibers provides resistant to high speed drilling, oxy-acetylene cuttings and jack attacks
- Boltwork - Secured by 4 active front bolts and 4 passive back bolts. Each bolt has a diameter of 32 mm.
- Locking - Secured with a single 3-wheel Keyless Combination Lock capable of 1,000,000 change codes and a 8 - lever double bitted Key Lock as standard. Both Locks operated independently of each other.
- Relocker - Keyless Combination Lock and KeyLock are protected by a String Relocker. Any forced attempt to dislodge the locks would activate these secondary locking devices. This restricts the movement of the internal boltwork system.
- Frame - Door frame is fabricated from steel sections, bent to form a single structure.
- Finish - The door comes standard with a painted grey primer based finish.
